

Go virtual.

Elevate facility operations with 3D models & virtual tours.

“ I recommend VTS to any operations manager, contractor or owner who wants to save time, reduce risk & improve the quality of redesign & construction.

Aaron Vermueulen, AIA, CDT, NCARB
Principal, OIX Studio

Access Properties Virtually

A simple and easy way to gain full access to buildings & facility assets in multiple views from any computer, tablet, phone or VR.

24/7 Asset Management

Document assets & conditions digitally for capital projects, renovations, inventory, upgrades, estimating, safety planning & simulations.

Remote Collaboration

3D models & virtual tours provide accurate digital models that reduce site visits and empower real time collaboration and planning better than being on site.

Measure, Plan & Simulate

Access, view and analyze facilities from anywhere at any time to plan and design with accurate dimensions and measurements.

Facility Operations Services

Digital Twins & Virtual Tours

3D cameras, laser scanners & drone technology are carefully selected for each site & use case.

Vendor & Stakeholder Management

Control and share access to virtual tours with vendors, stakeholders and executives for estimating, planning & communications.

Risk Management & Readiness Planning

Proactive inventory & digital documentation is invaluable for safety planning, incident management and insurance documentation.
