Brent Slawnikowski

is an industry leader with 14 years experience in reality capture and surveying. His expertise in vertical data capture, drones and digital twins is helping solving critical issues for carriers, tower owners and construction partners at scale. Brent spent five years at FARO Technologies working with AEC leaders to integrate 3D reality capture. He is a hands on leader who is focused on solutions.

With a workload we thought wasn't feasible, VTS and their team of data collection specialists helped us meet our client's demands. The level of professionalism and expertise that VTS delivers with data capture and management is amazing."

- Michael Cabral, Vice President, Hudson Design Group LLC
